No. 2/18

New engines, new chassis and an innovative control concept

Sime Darby Auto Performance presents the new Cayenne

Kuala Lumpur. Sime Darby Auto Performance (SDAP) is celebrating the first outing of the new third generation Porsche Cayenne in Malaysia. This globally successful model is a completely new development and combines even more of the typical Porsche performance with excellent everyday practicality.

The new Cayenne does not only continue its excellent balance of performance and practicality, but expands on it and now offers a wider range of standard equipment. The new Cayenne is now up to 65 kilograms lighter thanks to its intelligent lightweight construction. Its powerful turbo engines, new eight-speed Tiptronic S gearbox, new chassis systems and innovative Porsche Advanced Cockpit display and control concept with total connectivity takes both sportiness and comfort to the next level. Despite its steadfast focus on performance and comfort, the new Cayenne remains perfectly suited to off-road use.

“The new Cayenne promises to be more Porsche and more Cayenne than ever. Our primary objective was to further highlight the character of the vehicle. The new Cayenne is now more precise, elegant, athletic and expressive. The Cayenne has also been digitalised and networked throughout by providing another level of digital connectivity to the cockpit. This includes

versatility, quality and new cutting-edge driver assistance systems that offer both driver and passengers extraordinary comfort. This is how the Cayenne makes the Porsche experience even more fascinating but remains as a genuine sports car for five," said Arnt Bayer, Chief Executive Officer of Sime Darby Auto Performance.

The new Cayenne is available in three variants: The Cayenne's 250 kW (340 hp), three-litre turbo engine delivers 29 kW (40 hp) more than the previous model. The 2.9-litre V6 biturbo engine in the Cayenne S, which reaches speeds of up to 265 km/h, brings it up to 324 kW (440 hp) – an increase of 15 kW (20 hp). Equipped with the optional Sport Chrono Package, the new Cayenne S accelerates from zero to 100 km/h in less than five seconds.

The new Cayenne is based heavily on the iconic 911 sports car: For the first time, the SUV features mixed tyres and rear-axle steering. In addition, its on-road capabilities are further improved by active all-wheel drive as standard, Porsche 4D Chassis Control, three-chamber air suspension, the Porsche Dynamic Chassis Control (PDCC) electronic roll stabilisation system, and the newly developed high-performance Porsche Surface Coated Brake (PSCB).

The new Cayenne is now available for pre-order. To register your interest, please visit the following Porsche Centres:

Porsche Centre Glenmarie +60(3) 5030 9911

Porsche Centre Sungai Besi +60(19) 675 9911

Porsche Centre Penang +60(19) 400 9911
