Press Information

PERFORMANCE AND PRECISION: THE BENTAYGA V8 DEBUTS IN MALAYSIA.

- **Power, luxury, usability and sportiness**
- **4.0-litre, twin-turbocharged V8 petrol engine develops 542 bhp (550 PS) and 568 lb.ft. (770 Nm) of torque**
- **0-60 mph in 4.4 seconds (0-100 km/h in 4.5 seconds); top speed of 180 mph (290 km/h)**
- **Unmistakable V8 engine burble adds to emotional allure**
- **Optional carbon-ceramic brakes – world's largest front brake system**

(Kuala Lumpur, 16th October 2018) Since its introduction, the Bentley Bentayga has defined a new sector and set the luxury SUV benchmark, offering customers the ultimate Grand Touring experience unrestricted by landscape or conditions.

The award-winning Bentley model is now available in Malaysia in its most sporting guise to date – the Bentayga V8.

“The Bentayga V8 is the ultimate luxury SUV that delivers an uncompromising Bentley experience on- and off-road. We know this new model will be highly sought after by our customers thanks to its sleek, sporty look, immense power and acceleration,” explained Jerry Lee, Managing Director of Wearnes Quest.

At the heart of the latest Bentayga model is a new-generation 4.0-litre, twin-turbocharged V8 petrol engine, which combines immense power with impressive fuel efficiency. The addition of a characteristic V8 burble, stylish twin-quad exhaust pipes and optional carbon-ceramic brakes, reveals more of the luxury SUV's sporting character.

Sitting at the core of the Bentayga range, the new V8 model fuses exquisite luxury with power, usability and extensive sporting ability. Its responsive performance is fully customisable on demand by the driver through Bentley's Drive Dynamics system, from limousine-like refinement to sporting precision.

Sublime, Handcrafted Luxury Interior

The Bentayga V8 continues the Bentley tradition of intricate detailing and fine, handcrafted precision using authentic materials. Customers can specify hand cross-stitching, which highlights the interior styling lines of the seats and door panels, and there is the choice of the Bentayga's four-, five-, or seven-seat configuration, for ultimate versatility.

Three innovative new interior options are offered in the Bentayga V8: a high-gloss carbon-fibre finish replacing traditional veneer surfaces; a wood and hide steering wheel; and a new rich red leather, Cricket Ball.

For the first time in a Bentley, a high-gloss carbon-fibre finish is offered to customers seeking a contemporary, technical feel. Bentley has traditionally offered a matt carbon-fibre surface to replace the veneer on panels including the fascia, centre console and door waistrails, but this is the first time the finish has been offered with a high gloss, which enhances the technical weave.

Another first – the wood and hide trimmed steering wheel – can be specified in the Bentayga V8. Uniquely, the new three-spoke, wood and hide trimmed wheel (available in seven different veneer finishes) uses a solid wood base and thus maintains the integrity and authenticity of interior features offered by Bentley.

Cricket Ball leather makes its debut in the Bentayga V8. The evocative new colour is inspired by the traditional and instantly appealing deep chestnut hue of a new cricket ball, and fits perfectly into the inspiring range of 15 interior colours and five colour splits offered by Bentley.

Immense Performance, Impressive Efficiency

At the heart of the new Bentayga V8 sits an all-new 4.0-litre, 32 valve, V8 engine featuring dual twin-scroll turbochargers located inside the “V” of the engine.

The dynamic unit develops 542 bhp (550 PS) and 568 lb.ft. (770 Nm) of torque, resulting in a top speed of 180 mph (290 km/h) and 0-60 mph in 4.4 seconds (100 km/h in 4.5 seconds).

The class-leading performance of the Bentayga V8 is complemented by a range of 464 miles (746 km), with CO₂ emissions of 260 g/km. This refined efficiency comes, in part, through the ability of the engine to de-activate four of its eight cylinders in suitable conditions, without compromising the drive. The seamless change happens in just 20 milliseconds, making it imperceptible to customers.

The addition of the Stop-Start technology, which can activate at ‘near-to-stop’ speeds, also contributes to the emissions figure.

The unique blend of power and refinement gives the Bentayga V8 a distinct, unrivalled position in the luxury SUV market.

Striking, Individual Exterior Design

The exterior design of the Bentayga V8 reflects the model's sporting position within the Bentayga family.

The shape is defined by the Bentayga's unique muscular, sculptural lines, balancing athleticism with an unmistakable presence on the road. From the four round LED headlamps to the large matrix grille, the Bentayga V8 exudes the Bentley design DNA, while the overt powerline, large rear haunches and raised ride height reflect the off-road ability of the luxury SUV.

For the first time, optional carbon-ceramic brakes are offered on the Bentayga. The braking system is the largest and most powerful ever fitted to a Bentley, and the largest front brake system available on any production car.

Also introduced on the Bentayga V8 are sporting red brake calipers for the front and rear standard iron brakes. The calipers are painted in special, high-temperature resistant Tornado red paint, and signal strongly the dynamic intent of this performance-oriented Bentayga V8.

In front of these sit a choice of 11 wheel designs, including an all-new 22" five-spoke wheel with black painted and polished finish.

A purposeful black and chrome grille at the front is complemented by Bentley 'twin-quad' exhaust tailpipes at rear, both of which provide a further subtle reminder of the new engine specification.

Effortless Performance, Unrestrained by Climate or Terrain

The Bentayga V8 is available with Bentley Dynamic Ride – the world’s first electric active roll control technology that utilises a 48V system. The system instantly counteracts lateral rolling forces when cornering and ensures maximum tyre contact to deliver class-leading cabin stability, ride comfort and exceptional handling.

Bentley’s adaptive and reactive system provides variable torsional resistance, allowing the Bentayga to be both dynamically capable and comfortable for all occupants at all times. The pioneering use of a 48V system results in silent, instantaneous responses to deal with all road surfaces.

The Bentayga V8 offers class-leading comfort, steering feel and handling thanks to the partnership of a highly sophisticated chassis and Electronic Stability Control (ESC). In addition to advanced, multi-mode Traction Control (TCS), the Bentayga also features Hill Descent Control.

Electric Power-Assisted Steering (EPAS) is also featured on the Bentayga. The new system improves feedback to the driver, while providing isolation from steering kick-back on- and off-road. EPAS also features a variable rack ratio, permitting light and fast steering while manoeuvring at low speeds, as well as a more subdued response for excellent stability at high speeds.

The Bentayga offers the widest range of on- and off-road drive settings of any vehicle via Bentley’s Drive Dynamics Mode and optional All-Terrain Specification. Up to eight modes (four on- and four off-road) are available, allowing drivers, at the simple turn of a dial, to select the perfect dynamic

setup for any surface or road condition, be it Snow & Grass, Dirt & Gravel, Mud & Trail or Sand Dunes.

Meanwhile, the Driver Information Panel displays information on pitch, roll, wheel articulation, steering angle, compass bearing and altitude.

The Bentayga V8 comes with multi-mode air suspension. The driver has four different modes to choose from: High 2, High 1, Normal and Low. High 2, for example, can be manually selected when tackling more severe off-road surfaces. Customers can also lower the rear suspension via a switch in the boot, to ease loading and trailer hitching.

Hill Descent Control automatically regulates the vehicle's speed on steep declines, allowing the driver to concentrate fully on steering and obstacles ahead. It can be pre-set at speeds between two and 30 km/h (going in either direction) and works on gradients greater than five per cent.

Innovative Features and Advanced Technologies

A suite of state-of-the-art driver assistance systems and infotainment features designed to enhance safety, comfort and convenience make the Bentayga V8 an innovative, advanced and connected luxury SUV.

Adaptive Cruise Control (ACC) including Stop & Go, Predictive ACC and Traffic Assist enables the driver to maintain a set distance to the vehicle in front. Predictive ACC uses the navigation data, sensors and cameras to predict upcoming corners, city boundaries and speed-limit changes and can then modify the vehicle speed accordingly, improving both comfort and fuel economy.

There are a number of driver aids available on the Bentayga V8, purposely designed for urban environments such as Malaysian roads. These systems – such as Rear Crossing Traffic Warning, which uses radar technology to detect crossing traffic when reversing out of a parking space; and Top View, a system which uses four cameras to display an overall picture of the vehicle's surroundings – combined to enhance everyday usability.

Park Assist is also available – a system that detects suitable parking spaces (both parallel and perpendicular) before autonomous steering takes over to support parking manoeuvres.

Other innovative systems available include Night Vision, which uses infra-red technology to identify potential obstacles ahead, and a Head-Up Display, which reduces driver distraction and increases safety.

The Bentayga 8" touch screen infotainment system boasts class-leading navigation technology, a 60GB hard drive, and a choice of up to 30 languages. Rear seat passengers benefit from the introduction of the Bentley Entertainment Tablet – a removable 10.2" Android device with 4G, WiFi and Bluetooth for effortless, high-speed on-board connectivity.

Customers can choose between three different sound systems for the Bentayga V8: Bentley Standard Audio, Bentley Signature Audio and Naim for Bentley Premium Audio. The latter is the most powerful system in the segment, with 1,950 watts, a network of 18 speakers and super-tweeters for unrivalled recreation of the highest audio frequencies.

The Bentayga V8 is now available in Malaysia, priced from RM1,580,000 after duties (before options), and available for viewing at Bentley Kuala Lumpur. For appointments, please call +60 3 2165 1688.

Note to editors

Bentley Motors is the most sought after luxury car brand in the world. The company's headquarters in Crewe is home to all of its operations including design, R&D, engineering and production of the company's four model lines, Bentayga, Continental, Flying Spur and Mulsanne. The combination of fine craftsmanship, using skills that have been handed down through generations, alongside engineering expertise and cutting-edge technology is unique to UK luxury car brands such as Bentley. It is also an example of high-value British manufacturing at its best. Bentley employs around 4,000 people at Crewe.

Bentley Kuala Lumpur is operated by Wearnes Quest Sdn Bhd, Bentley Motors' official retail partner in Malaysia under the Wearnes Automotive Group. Led by Jerry Lee, its Managing Director, the company was incorporated to streamline the retail and aftersales operations of Bentley motorcars in Malaysia.

Wearnes Automotive, established in 1906, has over a hundred years of experience in the automotive industry and is also an established group dealing with premium luxury vehicles and related businesses in the Asia-Pacific region. The company operates in Malaysia, Singapore, Indonesia, Thailand, China, Hong Kong and Vietnam. Wearnes Automotive is a member of the StarChase group of companies.
